Natural stone products inherently lack uniformity & are subject to variation in aesthetics – color, shade, finish, etc. and performance – hardness, strength. When & where your stone is quarried will affect color. Check local building codes prior to specification & installation to verify that the product technical characteristics comply with required parameters. Final selection should be made from sample submittals. The existence & dimensions of bevel may vary from lot to lot. WARNING: This product can expose you to chemicals known by the State Of California to cause cancer, including crystalline silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/ polished or pulverized during fabrication/installation/removal.
